

Write a python program to combine two lists in reverse pairing.

Input

```
a = [1, 2, 3, 4]
```

```
b = ['a', 'b', 'c', 'd']
```

Output

```
['1d', '2c', '3b', '4a']
```

1.

```
a = [1, 2, 3, 4]
```

```
b = ['a', 'b', 'c', 'd']
```

```
result = [str(a[i]) + b[-(i+1)] for i in range(len(a))]
```

```
print(result)
```

2.

```
a = [1, 2, 3, 4]
```

```
b = ['a', 'b', 'c', 'd']
```

```
result = [str(x) + y for x, y in zip(a, b[::-1])]
```

```
print(result)
```
