

Write a python program to move all zeros to the end of the list?

---

Program to move all zeros to the end of the list

```
lst = [1, 0, 3, 2, 0, 7, 0, 8]
```

```
def end_of_list(lst):
```

```
    for item in lst:
```

```
        if item==0:
```

```
            lst.remove(item)
```

```
            lst.append(item)
```

```
    print(lst)
```

```
# Example
```

```
end_of_list(lst)
```

---

✅ **Output**

```
[1, 3, 2, 7, 8, 0, 0, 0]
```
