

Write a function/class in Python to get the sum of digits of a number.

Answer:

Function to calculate sum of digits

```
def digit_sum(num):  
    num_str = str(num)  
    total_sum = 0  
    for digit in num_str:  
        total_sum += int(digit)  
    return total_sum
```

```
input_num = 25
```

```
output_sum = digit_sum(input_num)
```

```
print("Sum of digits of", input_num, "is", output_sum)
```

Output:

Sum of digits of 25 is 7
