

Write a python program to Count frequency of words in a string?

Count frequency of words in a string

```
def word_frequency():
```

```
    s = input("Enter the string: ")
```

```
    words = s.split()
```

```
    d = {}
```

```
    for i in words:
```

```
        if i not in d.keys():
```

```
            d[i] = 0
```

```
            d[i] = d[i] + 1
```

```
    print(d)
```

```
word_frequency()
```

Example Input:

Enter the string: welcome to code paradise code paradise

Output:

```
{'welcome': 1, 'to': 1, 'code': 2, 'paradise': 2}
```
