Write a Python program to count the number of positive and negative numbers in a list.

Answer:

Program to count positives and negatives in a list

list1 = [2, -7, 5, -64, -14]

pos_count = 0

neg_count = 0

for num in list1:

   if num > 0:

     pos_count += 1

   elif num < 0:

     neg_count += 1

print("pos =", pos_count, ", neg =", neg_count)

Output:

pos = 2 , neg = 3
