Write a python program to **Reverse Date Format (DD-MM-YYYY → YYYY-MM-DD)**

Reverse Date Format (DD-MM-YYYY → YYYY-MM-DD)

date = "23-09-2025"   # given date in DD-MM-YYYY format

Split into parts

parts = date.split("-")   # ['23','09','2025']

Reverse order

reversed_date = "-".join(parts[::-1])

print("Reversed date format:", reversed_date)

✅ **Output**

Reversed date format: 2025-09-23
